World's Brightest Lights Illuminate World's Biggest Game

5 February 2007 - Los Angeles, CA – Luminys Systems Corp. today announced that its SoftSun lights – part of the company's proprietary line of lighting products that are the worlds most powerful and controllable single source lights – made their successful world sporting event debut at Super Bowl XLI. JustLighting of Las Vegas, Nevada, event lighting designers for Super Bowl XLI, selected SoftSun to further enhance the lighting brilliance of this year's event.

"It's a first in a sporting venue and we did it right at Dolphin Stadium," said Bill Brennan, President and lighting consultant of JustLighting, "We were able to push some quality lighting in a great facility from 55 footcandles to 180 footcandles. The result was stunningly brilliant light with incomparable depth of field and color rendering. It was literally a marked and visible difference in every way. "

Dolphin Stadium, which features 800 1,000-watt metal halide light fixtures for a total of 800,000 watts, saw the installation of 16 SoftSun 50K models within the facility which more than doubled the total lighting power while also supporting full redundancy. The result was significantly enhanced picture quality, as well as the ability to provide stunning slow motion replays at 400 frames per second without flicker.

"SoftSun's superior color quality delivered an enhanced high definition viewing experience to television sets throughout the world," noted David Pringle, Chief Technology Officer of Luminys. "We are grateful for the opportunity to use our unique technology to illuminate the world's biggest game."

About Luminys Systems Corp.

Luminys is the premier provider of highly-controllable, high quality light sources for professional and industrial use. The company's products offer the highest light output commercially available from a single source and provide an ideal replication of natural sunlight. Softsun® and Lightning Strikes® products have been used in the production of thousands of feature films, television series, and commercials over the last two decades, as well as numerous sporting events, concerts, and other live events. It has garnered two Technical Achievement Awards from the Academy of Motion Picture Arts and Sciences and a Primetime Emmy from the Academy of Television Arts and Sciences. Luminys is a subsidiary of Imagility Inc. www.luminyscorp.com
